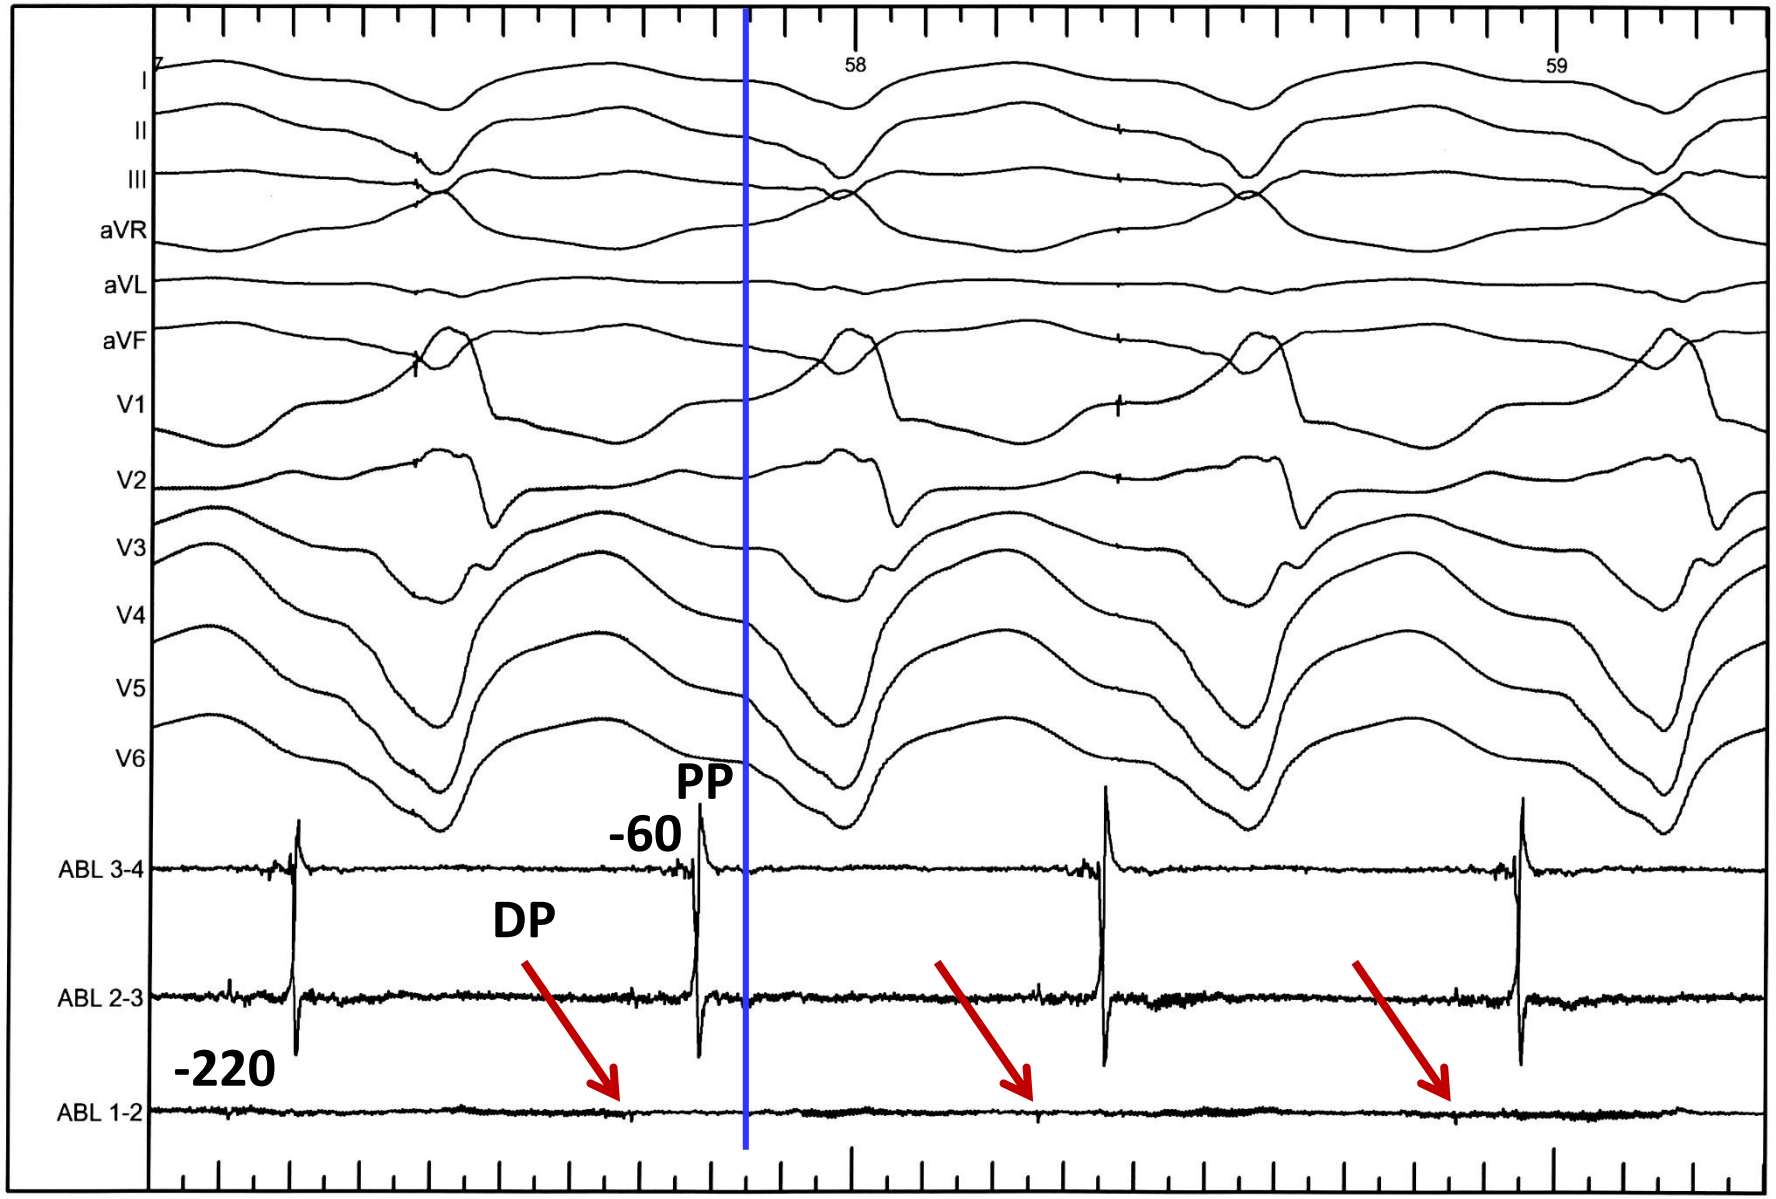
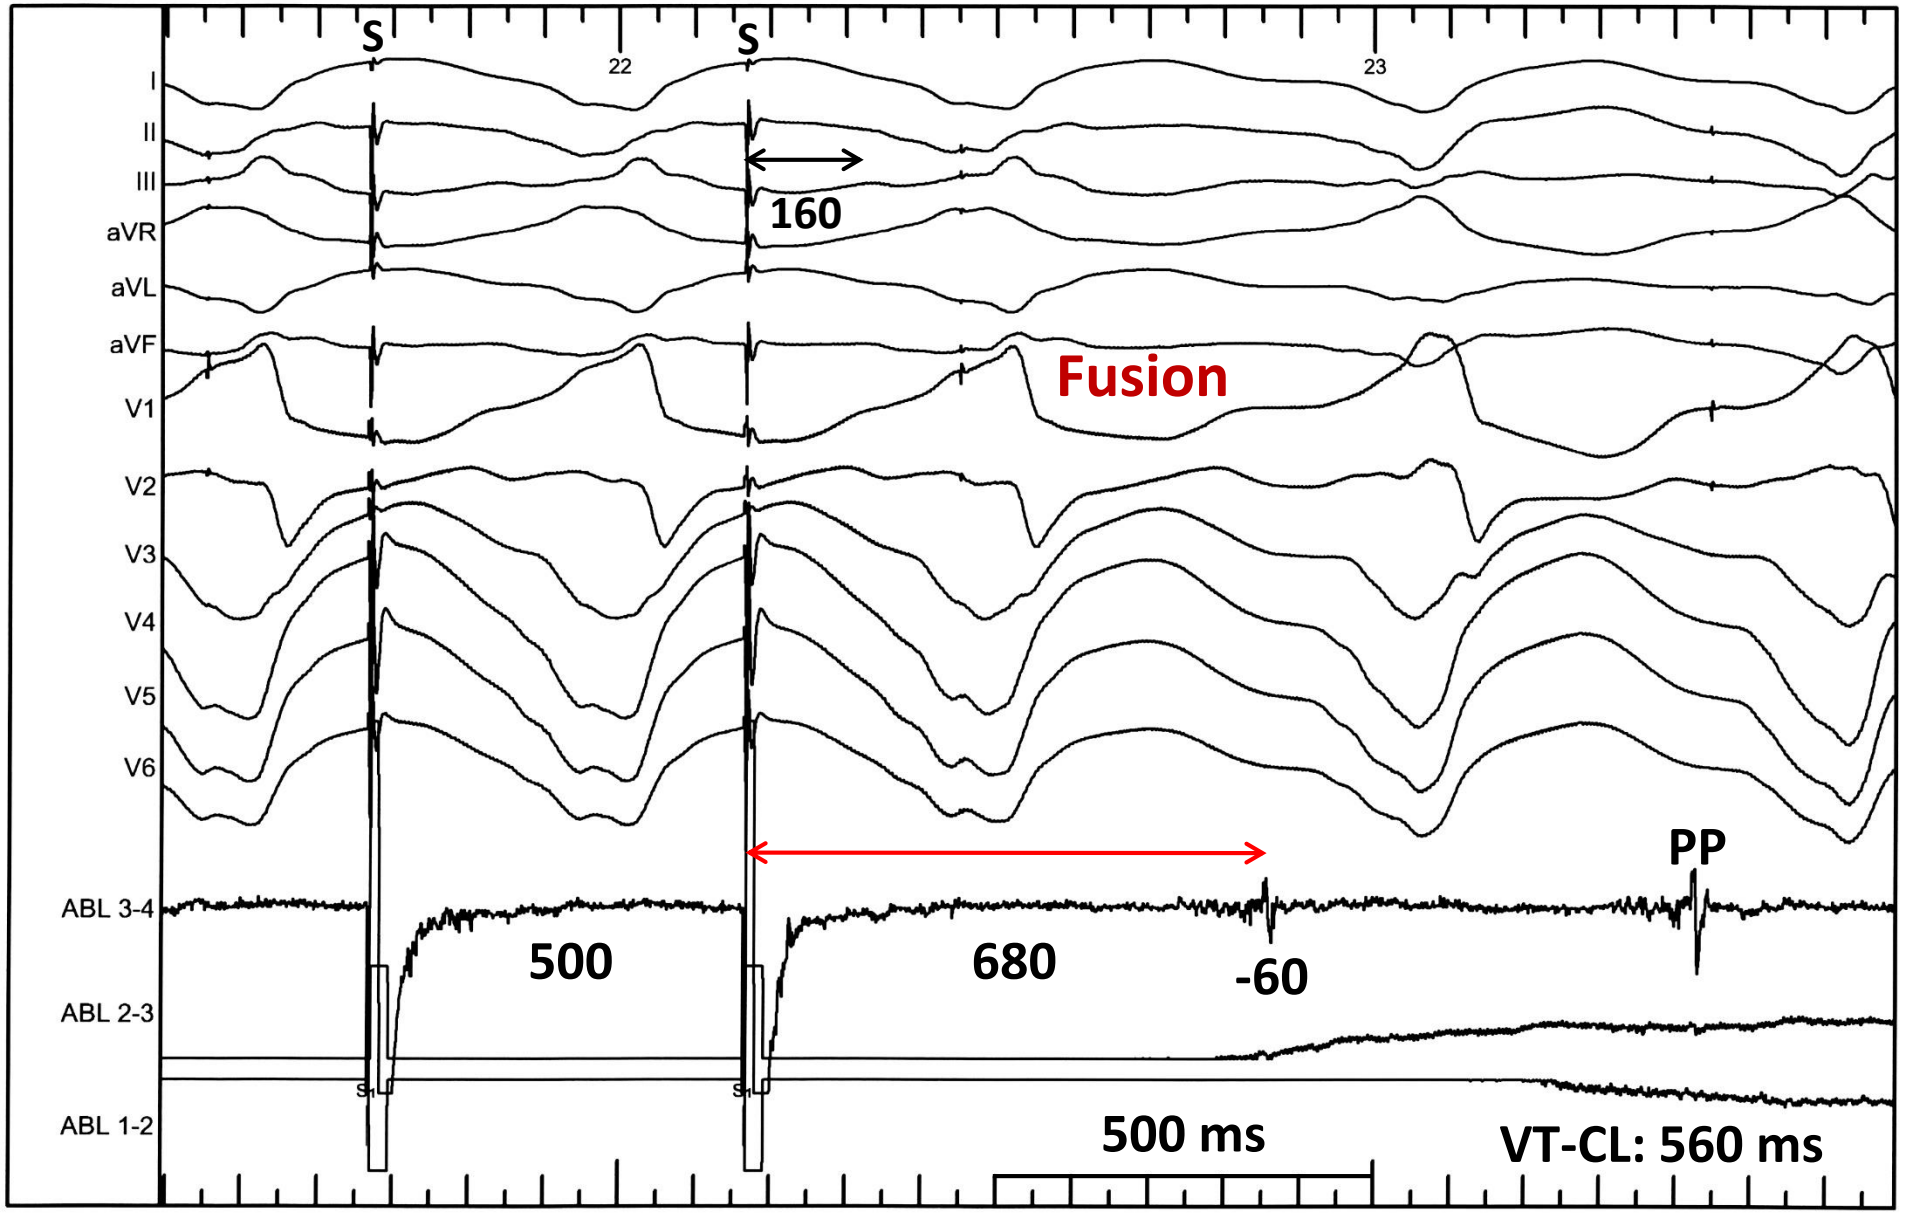
Why was the ablation successful?

66M with VT s/p DVR

Diastolic and Presystolic Potentials during VT



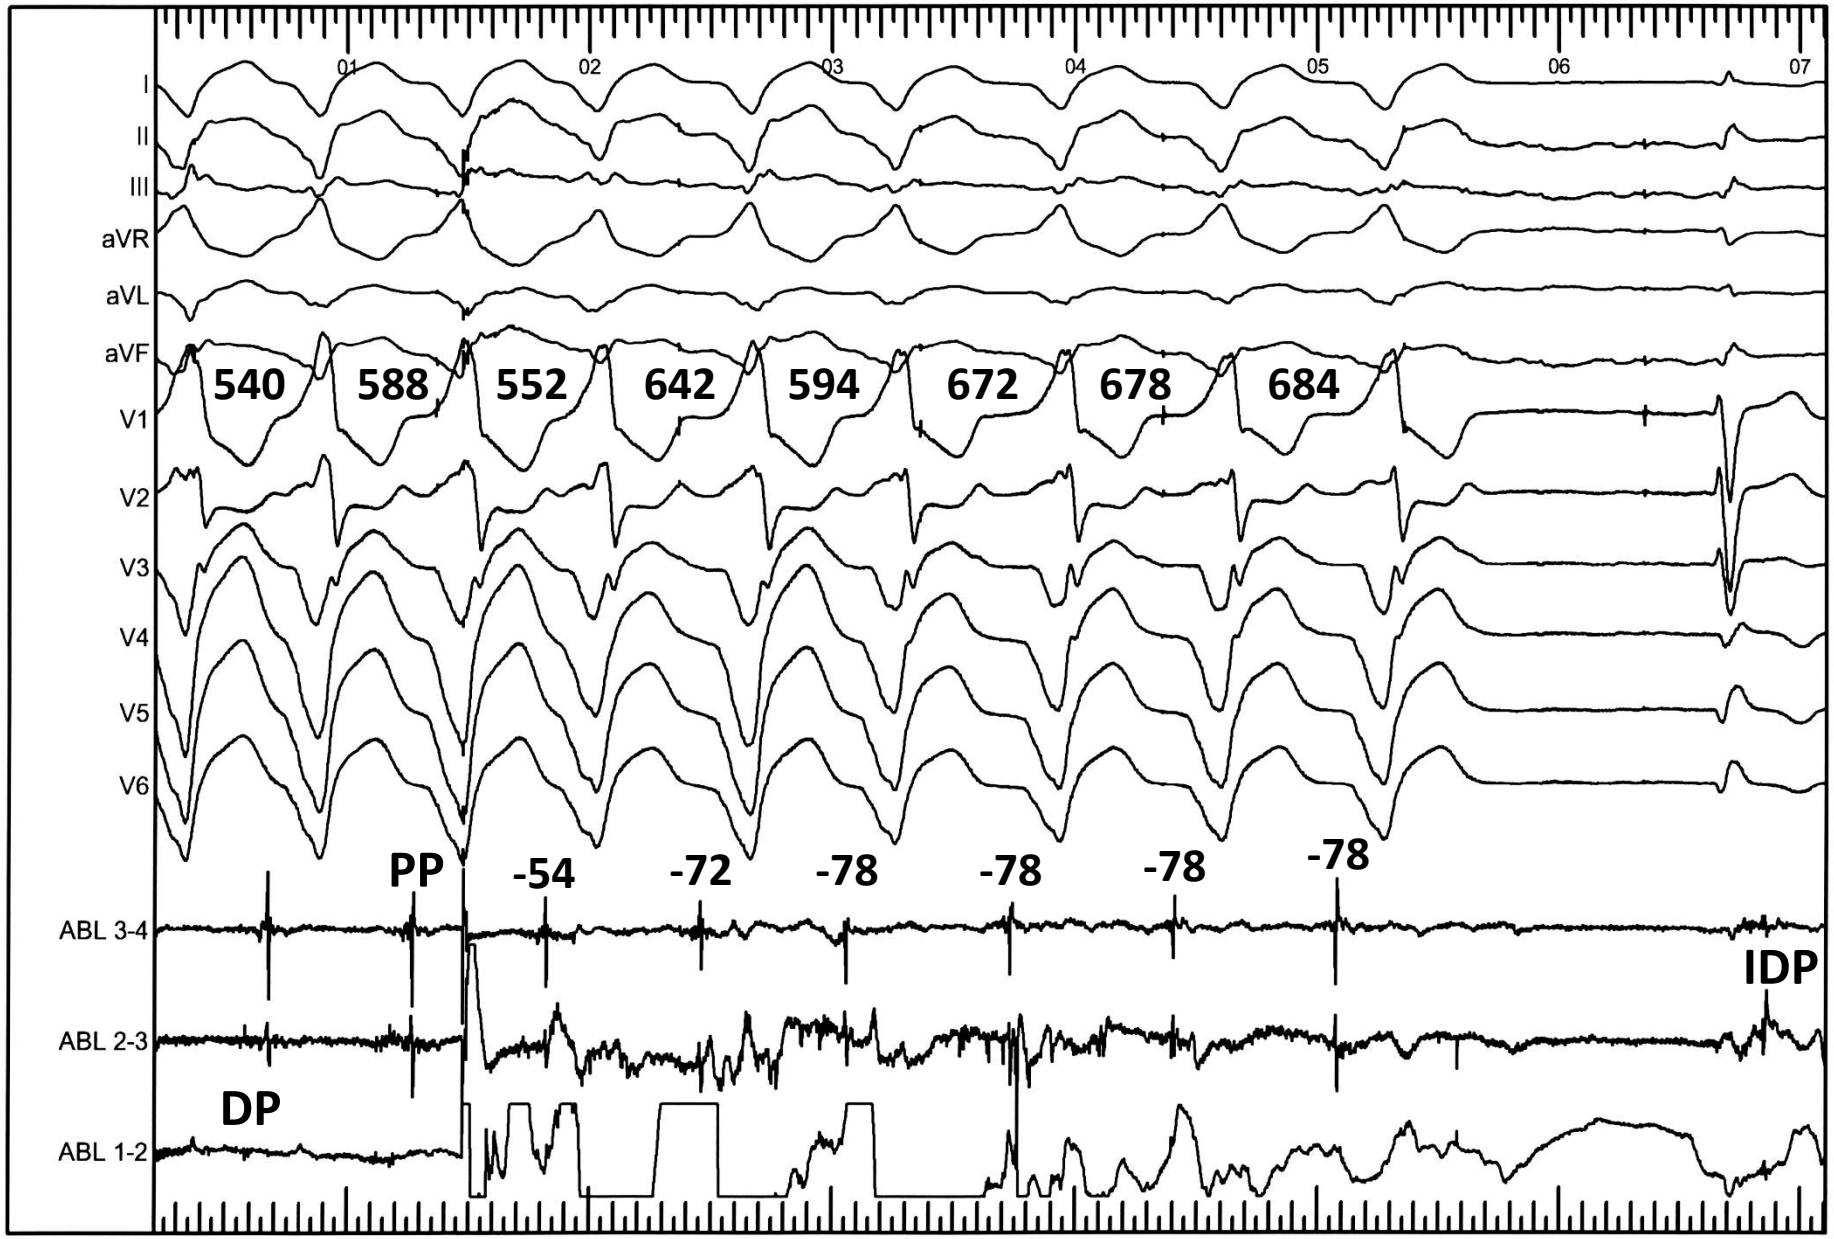
Entrainment



Q: Do you deliver RF at this site?

a. Yes
b. No
c. I don’t know

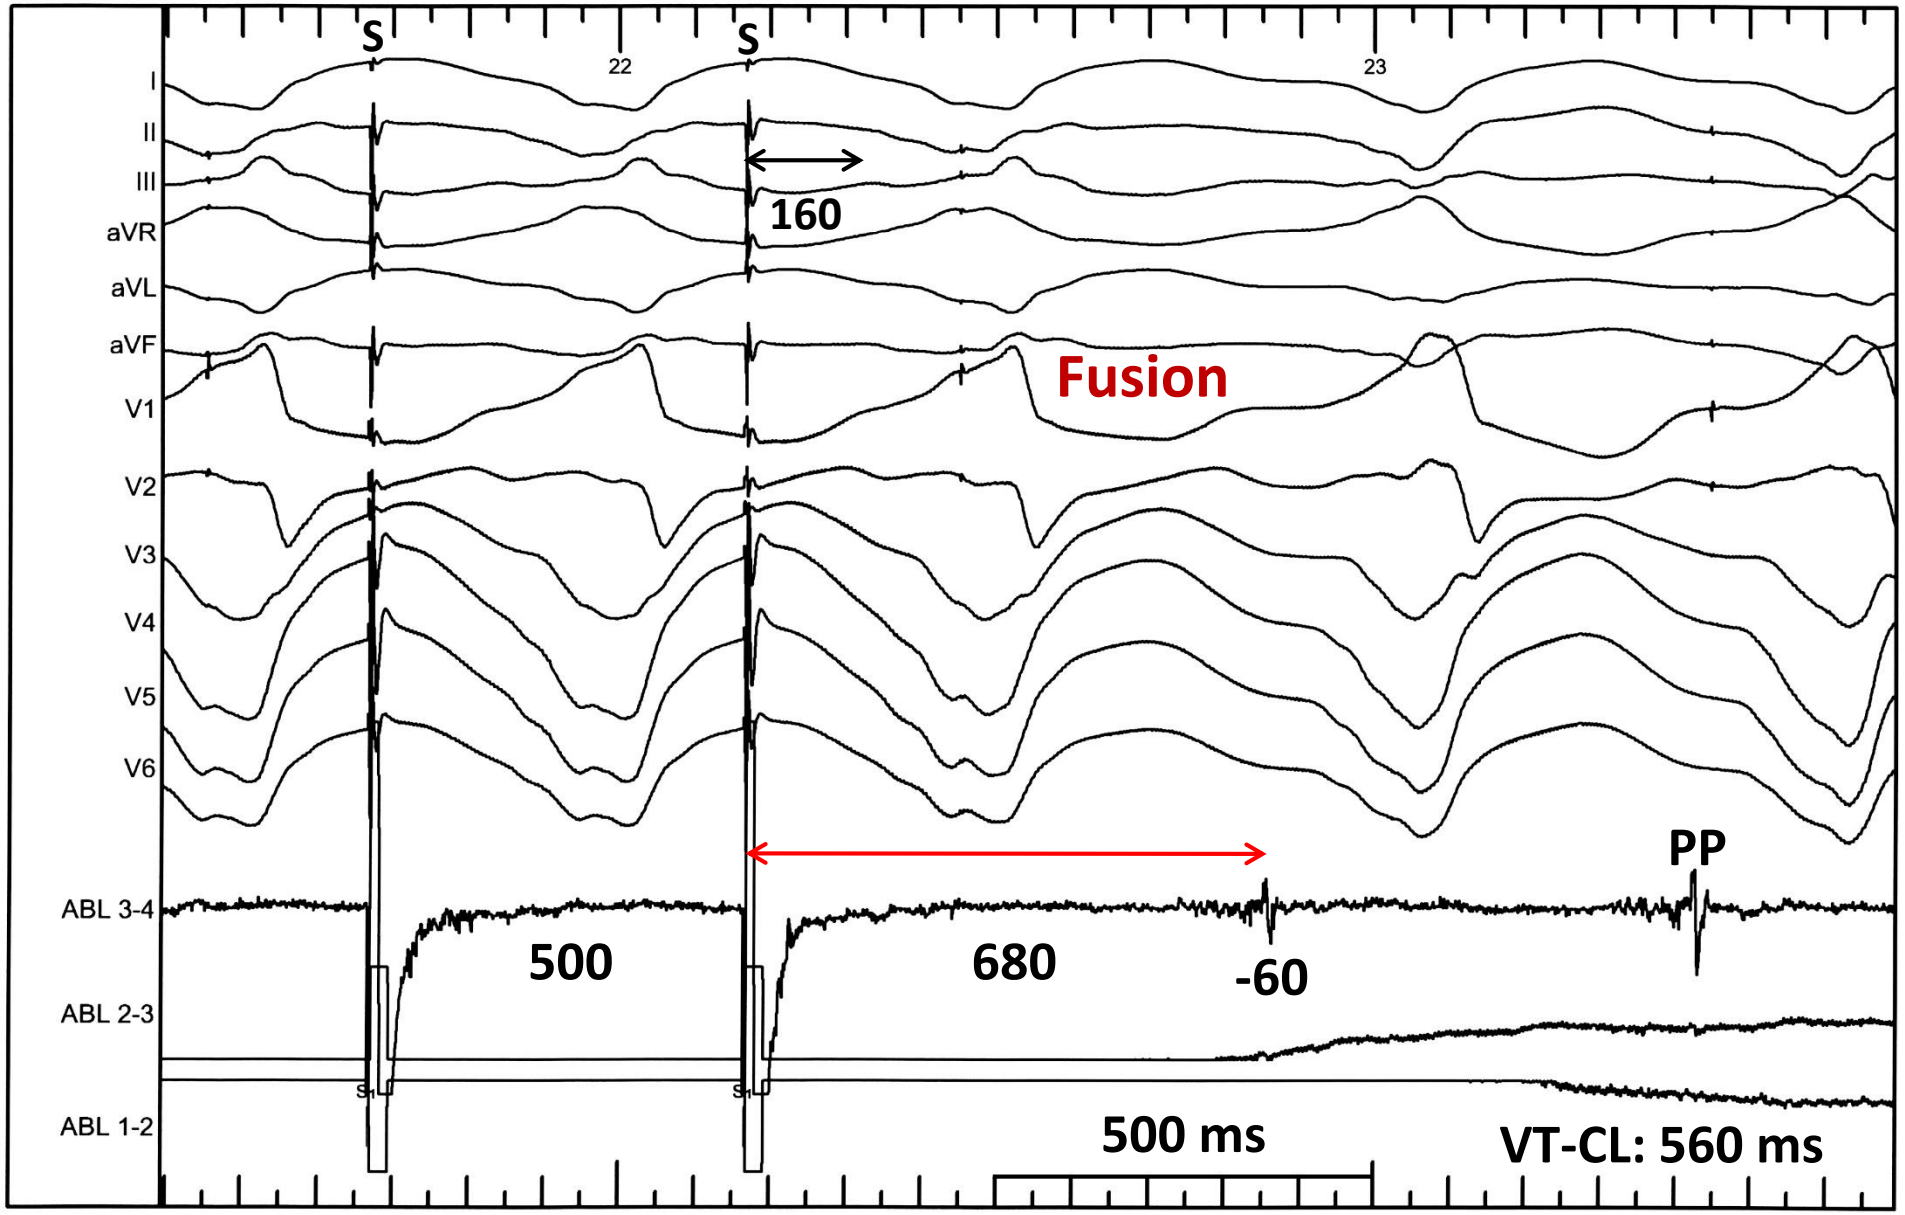
RF#1 Terminated VT!!



Q: Why did the VT terminate?

a. Entrainment criteria is only for endocardium
b. Delivered RF energy was strong
c. VT terminated incidentally
d. Entrainment was wrong
e. I don’t know

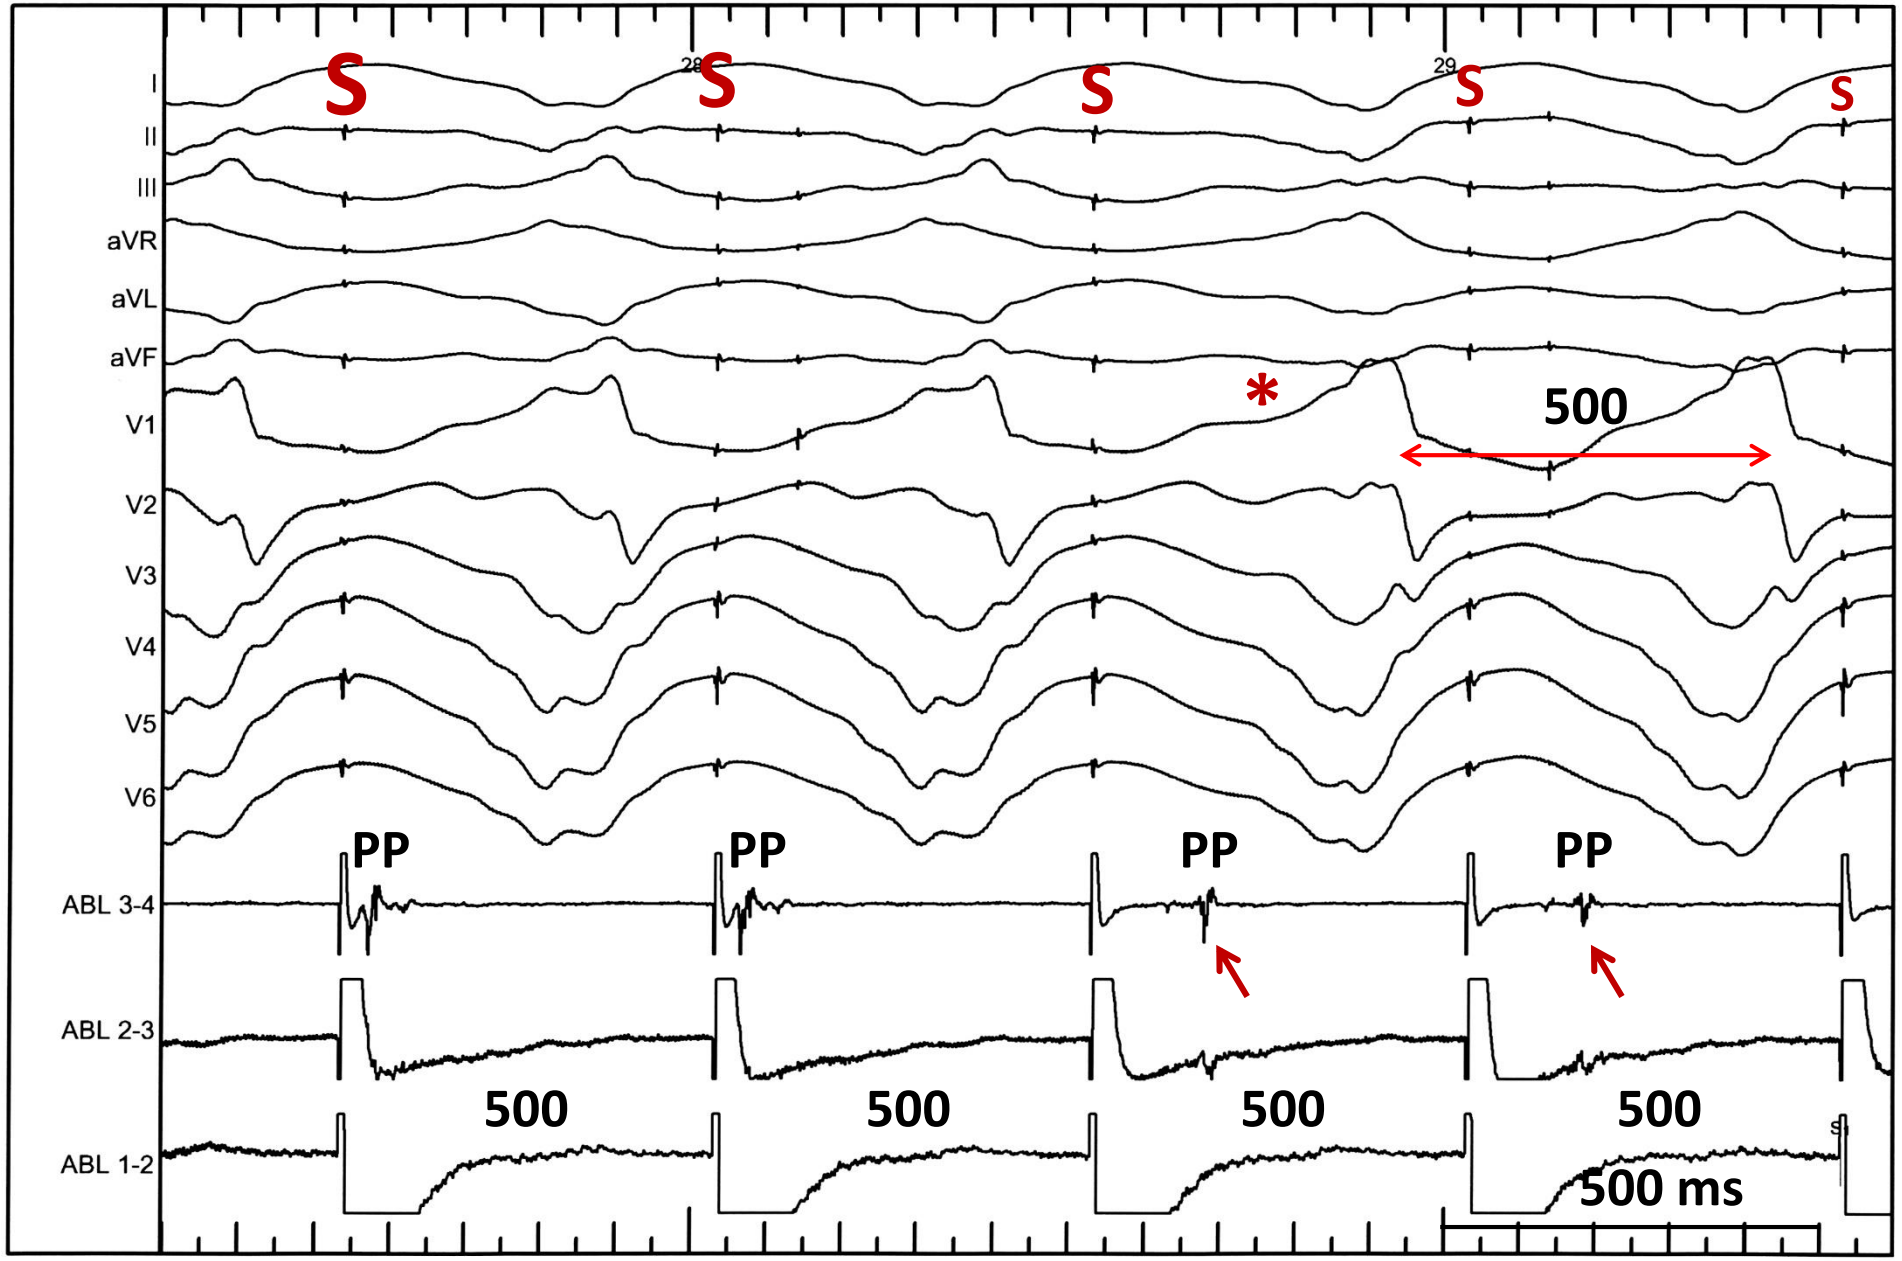
Entrainment at the "Successful" Site



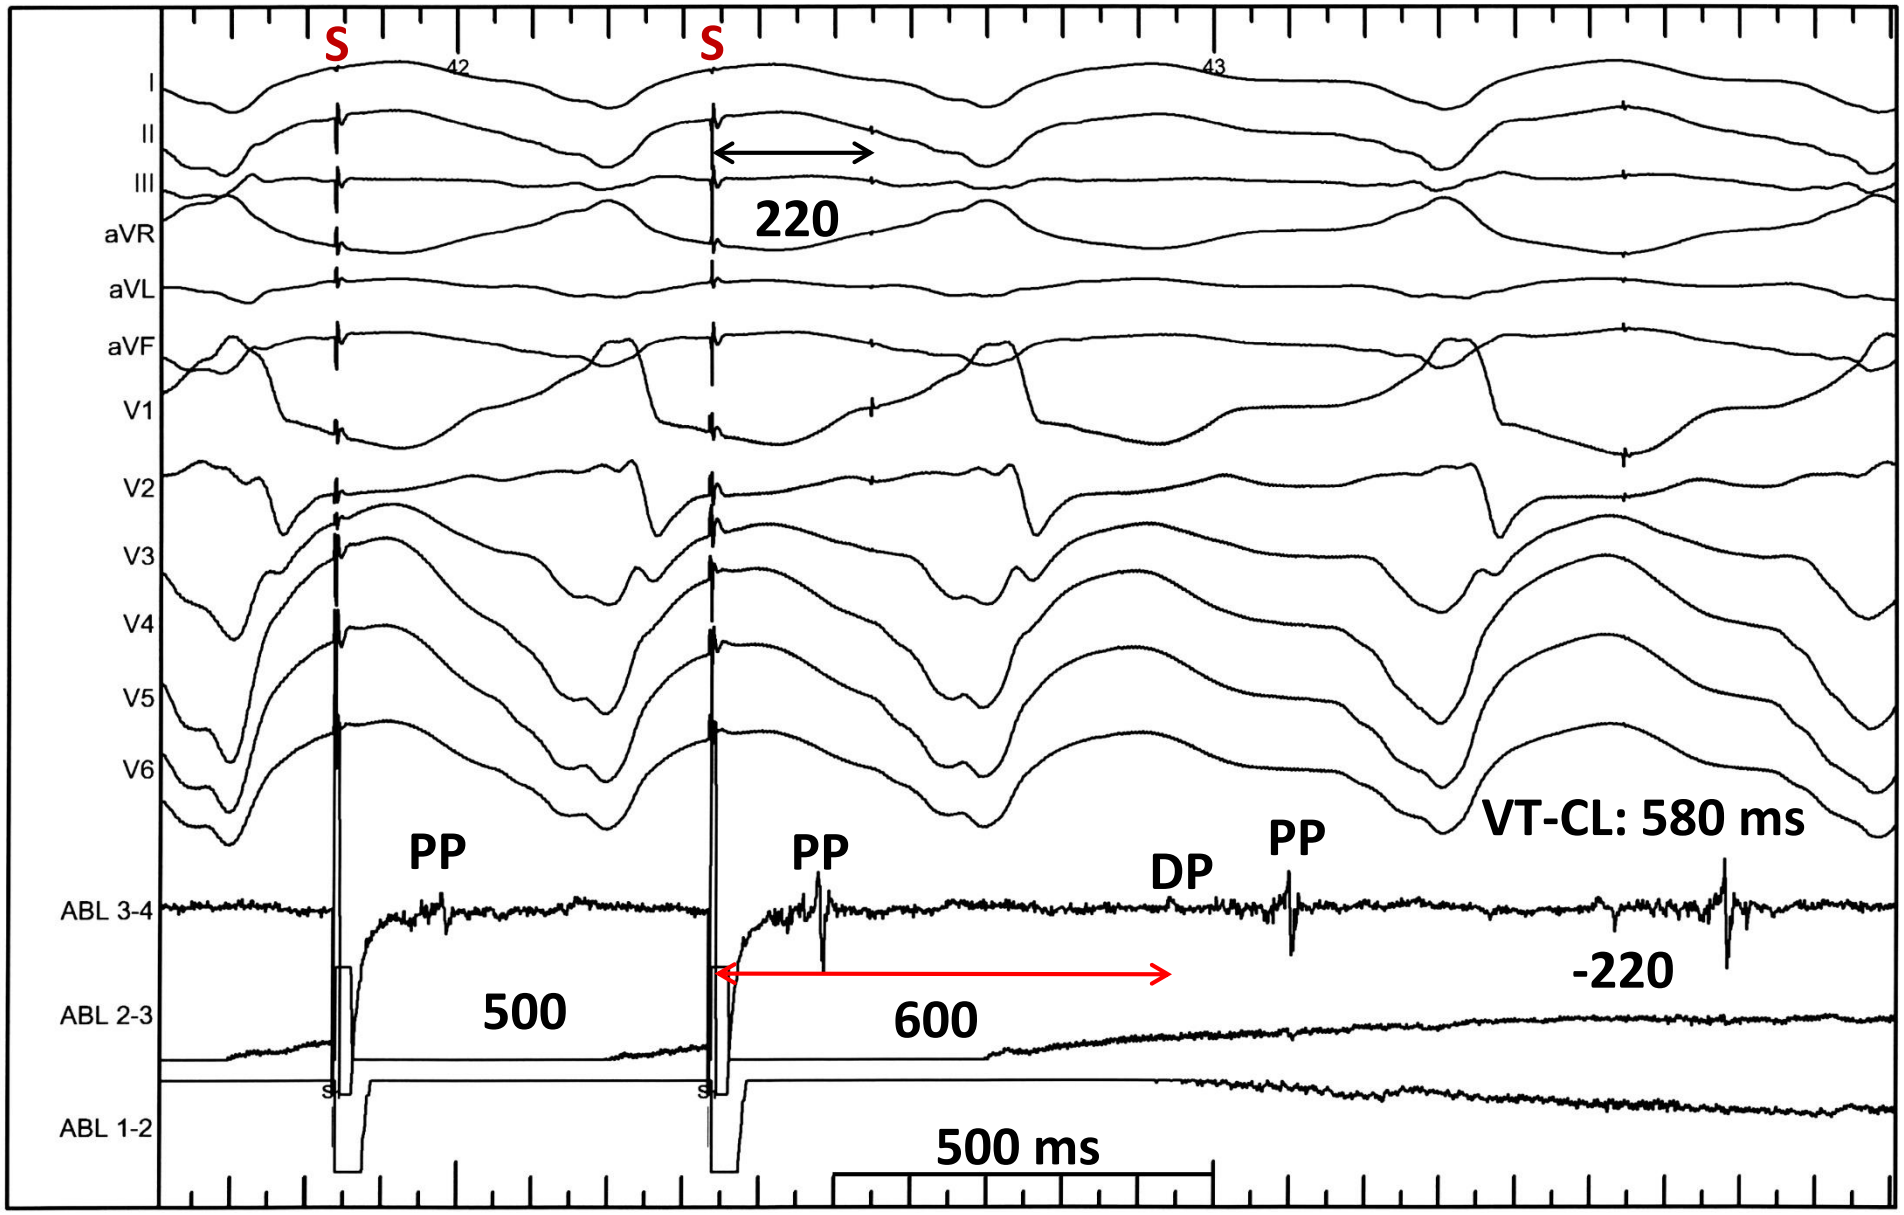
A: Why did the VT terminate?

a. Entrainment criteria is only for endocardium
b. Delivered RF energy was strong
c. VT terminated incidentally
d. **Entrainment was wrong**
e. I don’t know

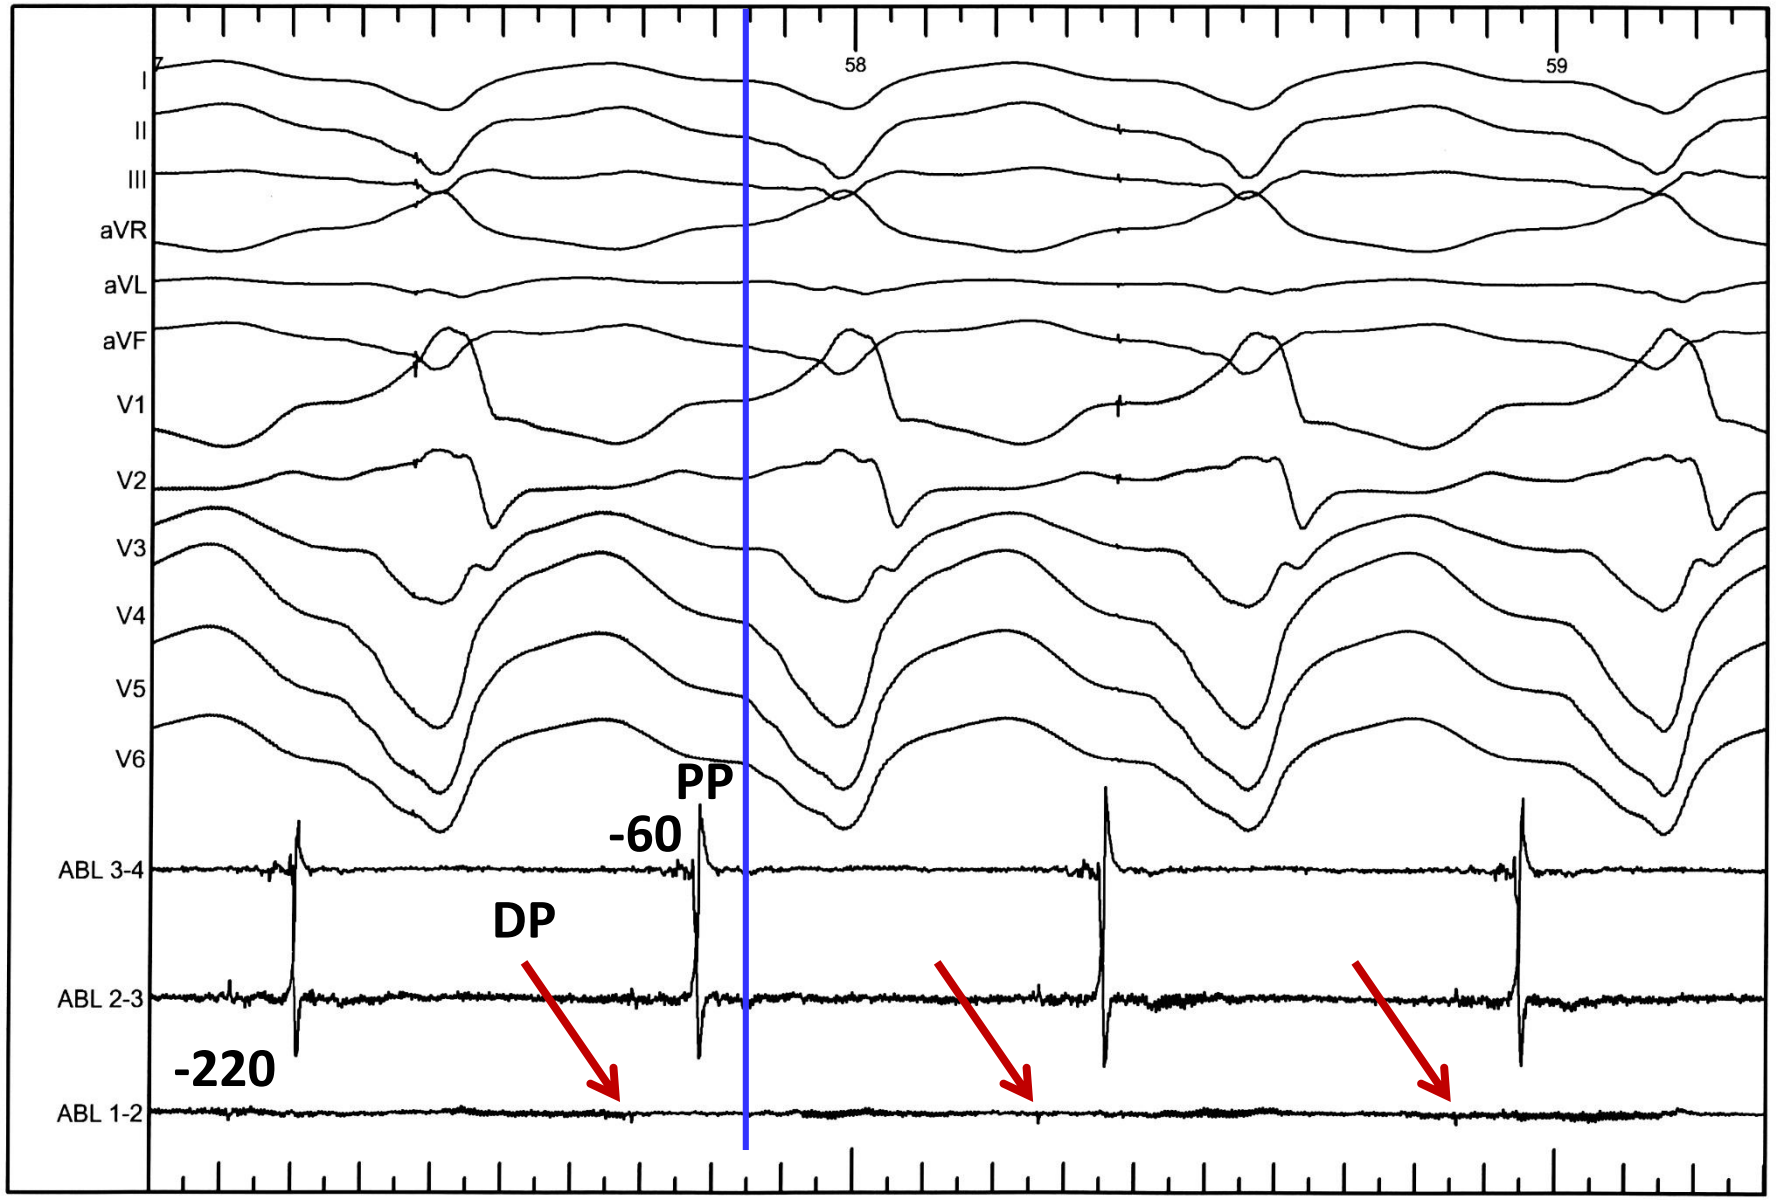
During Entrainment Pacing (Output Change)

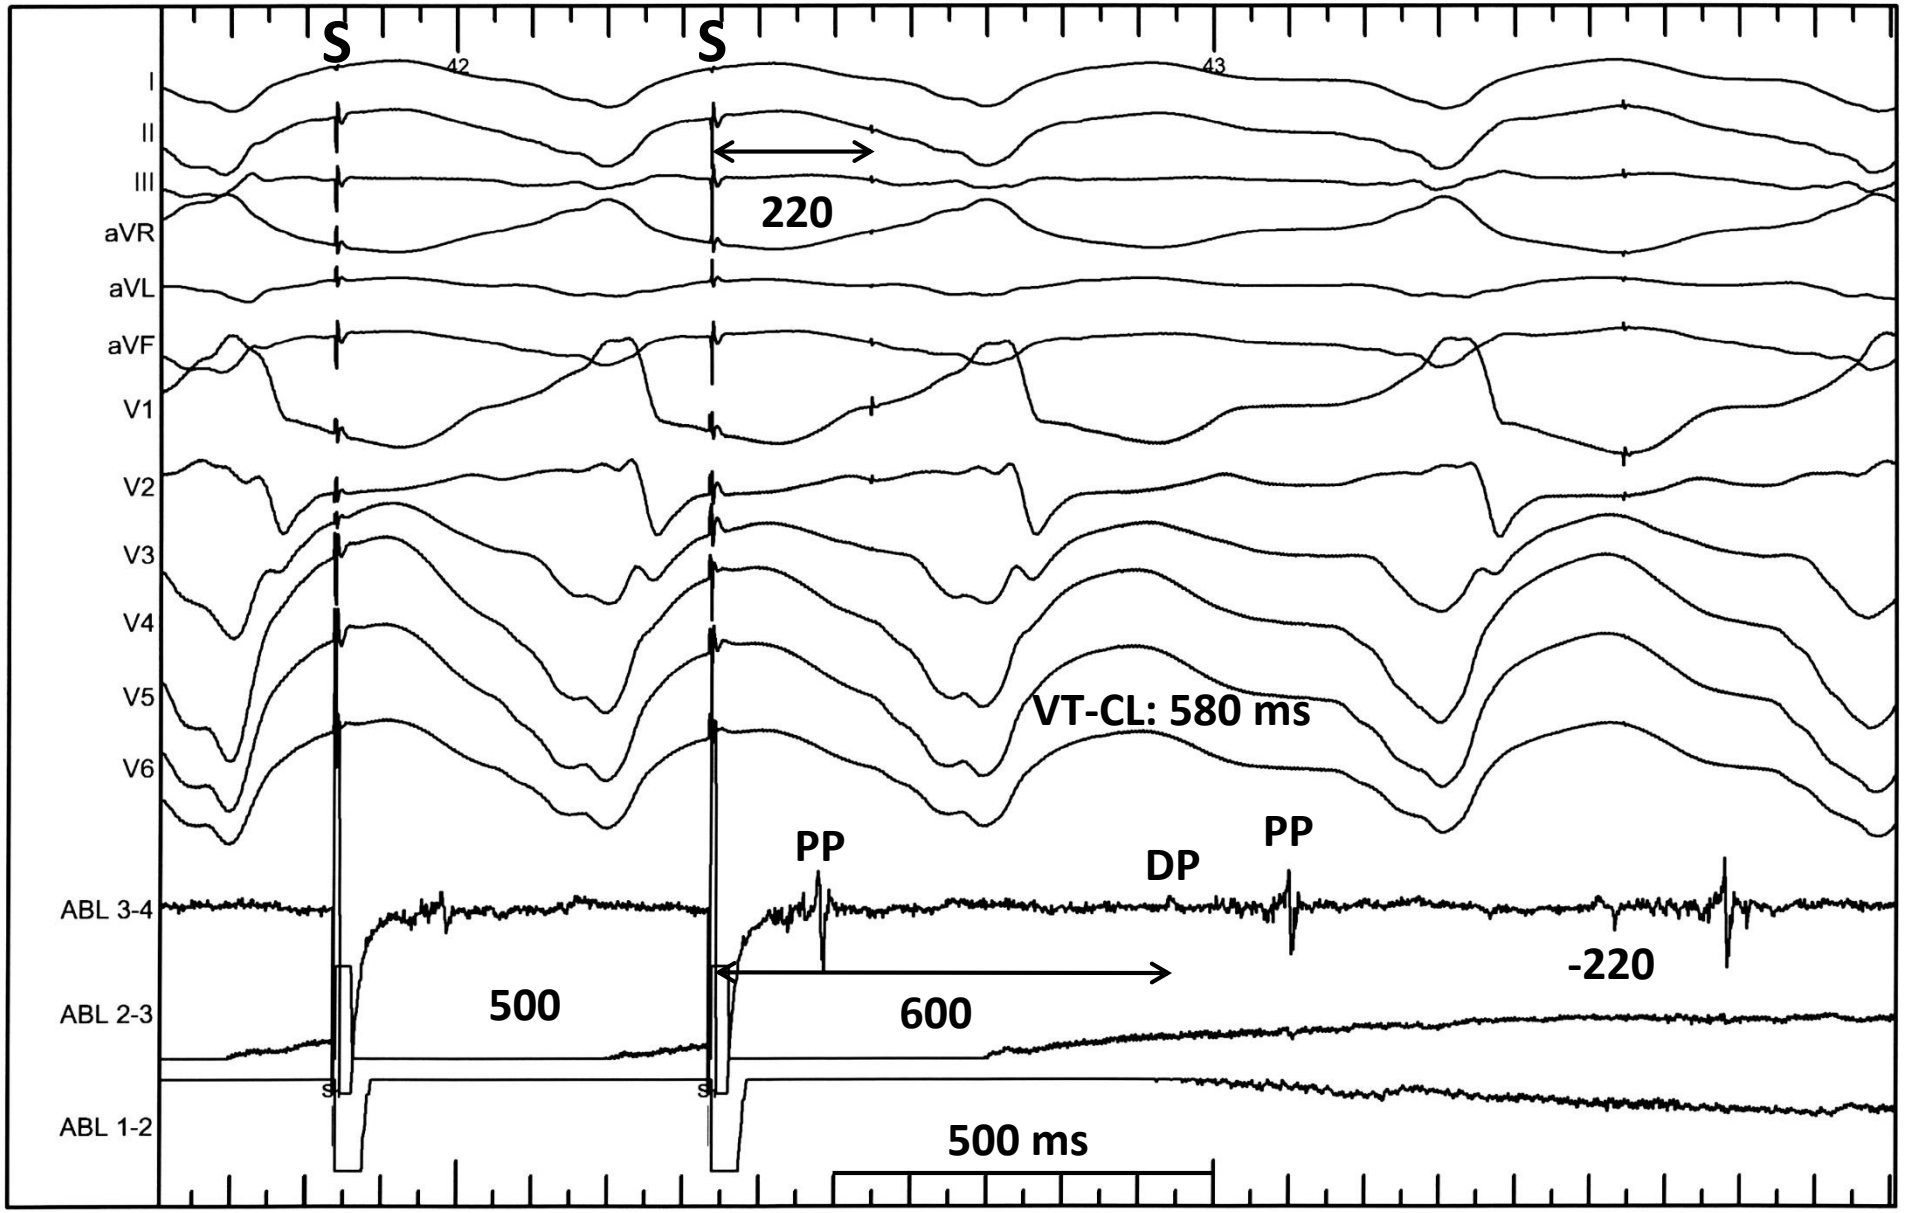


Post Pacing Interval @ Low Output



Diastolic and Presystolic Potentials during VT





Post Pacing Interval
